✓ Low cholesterol

Values for low cholesterol, low fat and high fiber foods meet with government regulated standards.

Low cholesterol = 20 mg or less

Low fat = 3 grams or less

High fiber = 5 grams or more

All nutrient values should be used as approximate guides.

The information contained on this site is based on standard product formulation.

Variations may occur due to differences in recipe revision or product assembly at the restaurant level.

Nutrient composition of foods may also differ due to changes in product formulation, suppliers, processing or package sizing.

Because of nutrient variation and the fact that data is collected from different sources, (food companies, USDA) inconsistencies may occur.
